DETAILED ACTION

Election/Restrictions

1. Claims 2, 11-13 and 16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 10 August 2005.
2. Claims 1 and 15 link(s) Species I-XII, and claim 6 links Species IX-XII. The election of species requirement among the linked inventions is subject to the nonallowance of the linking claim(s), claims 1, 6 and 15. Upon the allowance of the linking claim(s), the election of species requirement as to the linked species shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Drawings

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: reference numeral

Art Unit: 3767

725 (p. 16, line 18). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Terminal Disclaimer

4. The terminal disclaimer filed on 09 May 2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6,077,244 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 3-10, 14, 15 and 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,690,619 to Erskine.

Art Unit: 3767

Erskine discloses a medical device having a housing 230, needle 20, catheter 10, biasing element 40, needle retainer 250, flashback chamber 221, exposed surface 260, forward portion 269 and fluid chamber 221. See Figures 6-8.

Response to Arguments

6. Applicant's arguments filed 09 May 2006 have been fully considered but they are not persuasive.

In reference to claim 1, Applicant argues that Erskine does not show a latch that engages the catheter. See Remarks, p. 8, lines 21-26. It is considered that latch 250 engages element 260, which is considered to be part of the catheter.

In reference to claim 6, Applicant argues that Erskine does not show that the latch actuator is manually operated. See Remarks, p. 10, lines 1-8. It is considered that the exposed surface 260 must have been manually assembled and manipulated to achieve the position depicted in Figure 7. The claim also recites that the exposed surface is manually operable. This is given its broadest interpretation such that the device needs to be only capable of being manually operated.

In reference to claim 15, Applicant argues that Erskine does not show or suggest that the needle retainer is substantially permanently attached to the needle. See Remarks, p. 10, lines 18-23. This limitation is given little patentable weight. It is considered that many things considered to be permanent are not really permanent (e.g., permanent markers, tattoos, super glue, etc.). The given examples can be altered so that they are no longer permanent when used. Here, the

Art Unit: 3767

attachment between the needle retainer and needle is considered to be permanent until the device is altered.

For the reasons given above, the rejections under 35 U.S.C. §102(b) is hereby maintained.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
